

NOW YOU CAN UNDERSTAND THE NIGHT SKY

ASTRONOMY ON THE BEACH

- ✿ Finally, a simple explanation of the basics of space
- ✿ You'll be given a star chart to keep & shown how to use it
- ✿ You'll learn how to find stars, planets, galaxies & constellations
- ✿ You'll also understand what they are
- ✿ You'll discover that the Southern Cross sometimes disappears and then be shown how to find it again
- ✿ As a finale you'll be introduced to someone from outer space...promise!

DON'T YOU WONDER ABOUT THE STARS?

Wouldn't it be great to know the basics? Like:

- ✿ What's the difference between a star and a planet?
- ✿ That you can see 2 galaxies every night with the naked eye?
- ✿ Why the stars change throughout the year?
- ✿ Why do some stars twinkle?
- ✿ Some stars may have died many years ago but they're still shining?

WE MAKE IT REALLY EASY FOR YOU TO UNDERSTAND. THERE'S NO INTENSE BRAINWORK.

What you'll be doing

First, a brief illustrated talk, explaining the universe, in the Conference Room. Then on to the beach and into darkness to see what you discovered in the talk. With the help of an astounding "space laser" and binoculars (we supply) you'll learn how to roam the cosmos. You'll be saying "Wow".

You can still see the stars even if it is cloudy.

With today's technology you can "virtually" see the stars even when the sky is cloudy. Every single object in the night sky has been photographed and mapped. Tonight's sky, as it really appears, can actually be projected on to the big screen. So in the event of cloud, it will be Astronomy in the Conference Room instead of on the beach.

✿ Begins: 8.30pm • Ends: 10pm • Duration: 1½ Hours

✿ Adults: Only \$29 • Children: 7-16 yrs. ½ price • 6 and under: free
